Providing Global Solutions Locally

Modular Handrail Solutions For the Petrochemical Industry

- **SAVE UP TO 50% ON INSTALLATION COSTS**
- **NO HOT WORK PERMIT REQUIRED**
- **COST EFFECTIVE ALTERNATIVE TO WELDED HANDRAILS**
- **INDEPENDENTLY TESTED TO AS1657**
- **REDUCED MAINTENANCE COSTS**
- **DESIGN, CONSTRUCT & MAKE ALTERATIONS WITH MINIMAL PLANNING**
- **REUSABLE FITTINGS**

Modular Handrail Solutions for The Petrochemical Industry

Kazed Industrial Solutions, a leading distributor of modular components for handrails, safety barriers and railings, offer safe systems for separating people from hazards. **Safety** is paramount to protecting your most valuable asset - your people and those ever present hazards are most prevalent in the offshore Petrochemical industry. **Working safe** is working smart and now with the use of our modular systems they are cost effective.

Kazed modular systems have been approved by some of Australia's largest offshore companies and incorporate slip-on pipe fittings from the leading manufacturers around the world with all components built to **ISO 9002 standards**. The fittings are designed to reduce the difficulty of installing and repairing platform handrails in hazardous locations whilst maintaining safety compliance.

Malleable cast iron fittings are hot dipped galvanised and painted to meet the stringent requirements of the Petrochemical industry.

The broad range of components allows for a variety of engineered solutions. Fittings are hot dipped galvanised for corrosion resistance and have been used extensively throughout industry for generations to build handrails, safety barriers, stair rails and many other modular safety railings.

The Kazed Modular System can be found on **many** hazardous environments, offshore and on land where safety is paramount.

No welding, no grinding, no threading, **no hot work certificates** and no need for expensive on site tradespeople. Installation requires only simple hand tools, delivering up to **50% savings** in time and labour compared to the old method of welded rails. **Simplicity** is the key, secure connection is achieved by hand tightening to 40NM with an allen (hex) key. Each tightened grub screw provides a minimum of 920 kilograms of slip resistance.

Modular System Components

- MODULAR CONCEPT TO SUIT MOST ONSITE APPLICATIONS
- NO HOT WORK PERMITS REQUIRED
- COST EFFECTIVE: SAVE UP TO 50% ON INSTALLATION
- MEETS LOADINGS UP TO 1500nm
- CORROSION RESISTANT
- INDEPENDANTLY TESTED TO AS1657
